OREGON® has been the leader in chainsaws chains and bars for more than 70 years, and its expertise and quality products are recognized by professionals all over the world.

It's now time for you to discover the quality of OREGON® spark plugs, similar in all aspects to market leading brands (quality, performance, longevity).

You try it – you adopt it!

OREGON® spark plugs have been specially designed for use in chainsaws, brushcutters and mowers. They remain stable both when idling and operating at maximum power, i.e. at the speeds most often required for these applications. OREGON® spark plugs are designed to prevent carbon deposits which can lead to misfiring and internal damage. Their specific design ensures their longevity and excellent resistance to vibration.

OREGON® spark plugs are produced in accordance with ISO/IEC 27001, ISO 14001 and IATF 16949 - certified quality management system, which also meets the requirements of the automotive industry standard VDA 6.1.

The spark plug is a very technical and extremely important item, responsible for optimizing combustion in an engine.

The choice of spark plug determines the life of an engine.

The copper/nickel core improves heat dissipation:

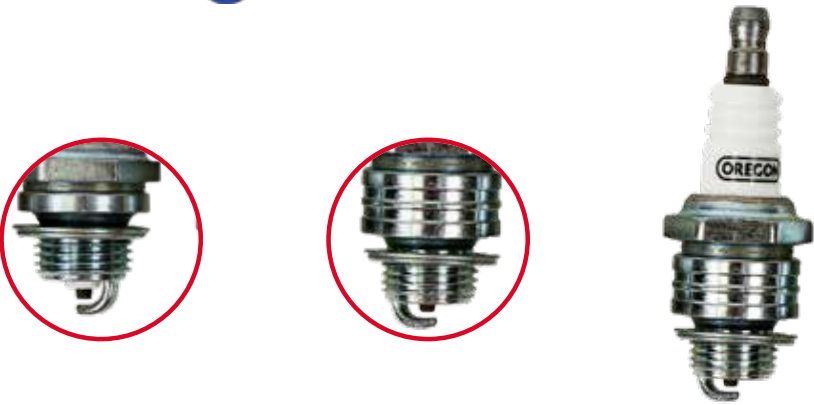

- Greater heat range
- Prevention of intermittent overheating that can cause pre-ignition
- Reduced fouling

Resistance on the spark plug prevents the performance of the engine and the environment being affected by the interference produced by the sparks.

Rely on the quality of OREGON® spark plugs to get your lawnmower, but also your chainsaw, brushcutter and tractor start right!

NEW 11 NEWCOMERS IN THE SPARK PLUGS RANGE !

MADE IN EU

Oregon® Single pack		CROSS REFERENCES			Special Features
		NGK	Champion	Bosch	
+NEW 77-193	●	BKR5E / BKR5EY / BCPR5E / BCPR5EY	-	FR8D+ / FR8DC+	Spark plugs with single ground electrode. The ground electrode is "A-shaped" with higher quality zinc/nickel finish and extended replacement interval. One ground electrode and centre electrode with higher thermal conductivity. The insulator tip ensures perfect function at low load.
+NEW 77-194	●	BR6S	RJ6 / RJ6C / RJ6J / RJ12C	WR7EC / WR9EC

+NEW 77-198	●	BPMR6F	-	-	Spark plugs with centre electrode made from a special nickel alloy, which perfectly cover the requirements of engines without catalysts. One ground electrode. Centre electrode made from a special nickel alloy. Good resistance against electrode burnings. Galvanic zinc plating finish.

NEW SHOP PACK PACKGAGING!

MADE IN EU 

- **NEW** carton packaging: Eco-friendly and more suitable shape for transport.
- Contains **40 spark plugs** instead of 50.
- **NO PRICE CHANGE** per spark plug compared to previous shop pack.
- **NEW** 'sealed' sticker : proof of quality at reception of goods.

Benefits

- Optimum ignition
- Easy starting, even in cold weather
- Optimal engine performance
- Complete combustion, clean exhaust gas
- Longer plug life

Terminal pin
Made of a steel wire resistant to vibrations. Its lower part is designed for connection with the seal, the upper part is used for the attachment of high voltage inlet.

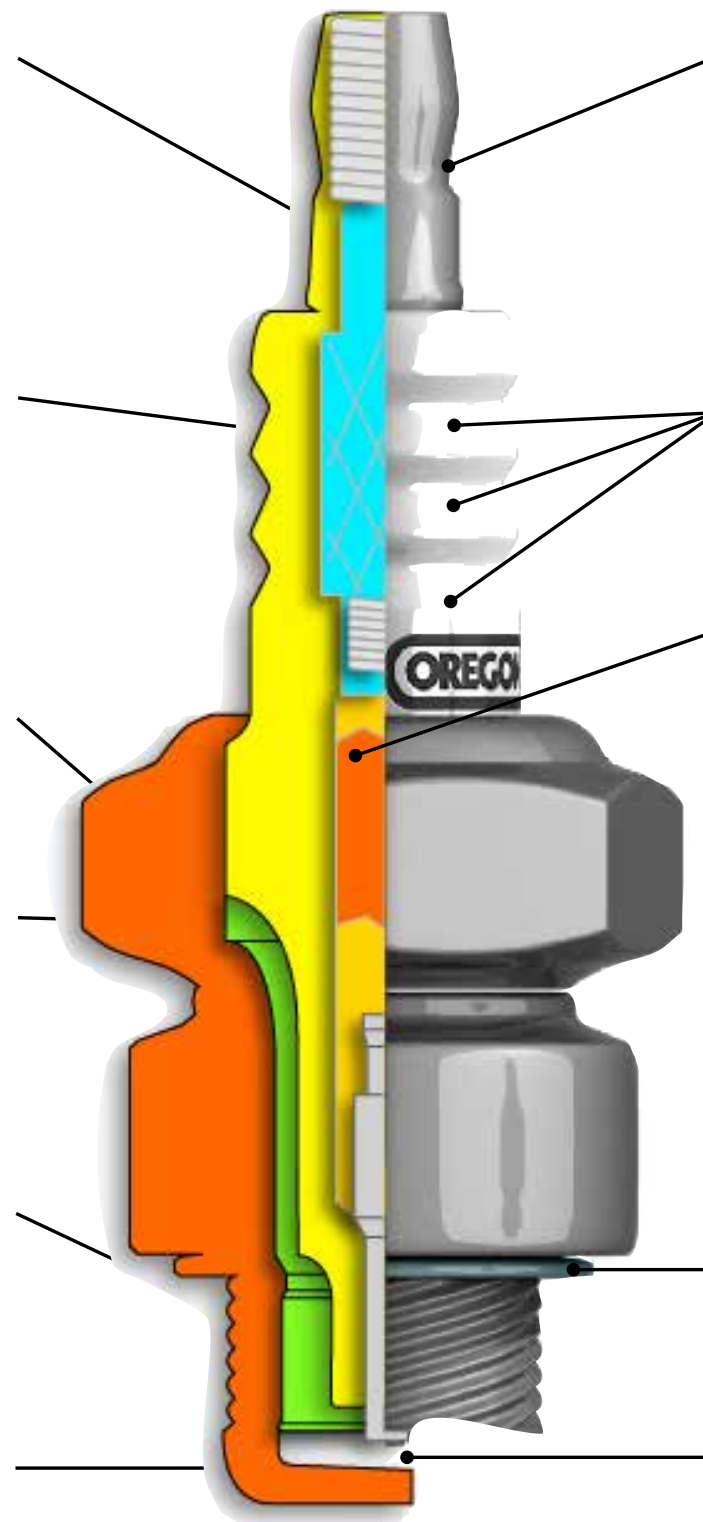

Insulator
High content of aluminium oxide Al_2O_3 ensures a high insulation resistance, good thermal conductivity and mechanical strength.

Shell
Features a high mechanical strength and surface protection from corrosion.

Internal sealing washer
Ensures gas tightness of the combustion chamber and a perfect heat transfer from the combustion chamber to the shell.

Centre electrode
Features high resistance to burn-off and optimum thermal conductivity.

Ground electrode
Features high resistance to burn-off and optimum thermal conductivity.

Terminal nut

All Oregon spark plugs have locked terminal nuts to ensure efficient connection and resistance to vibration even in extreme conditions.

Ribs

On insulator surface extend surface trajectory for eliminating any surface discharges.

Resistive seal

- mechanical connection of insulator, terminal pin and centre electrode
- electrical connection of terminal pin and centre electrode
- gas tightness of the combustion area

For spark plugs with radio interference elimination it provides suppression of electromagnetic radiation. There are two contact layers and one resistance layer.

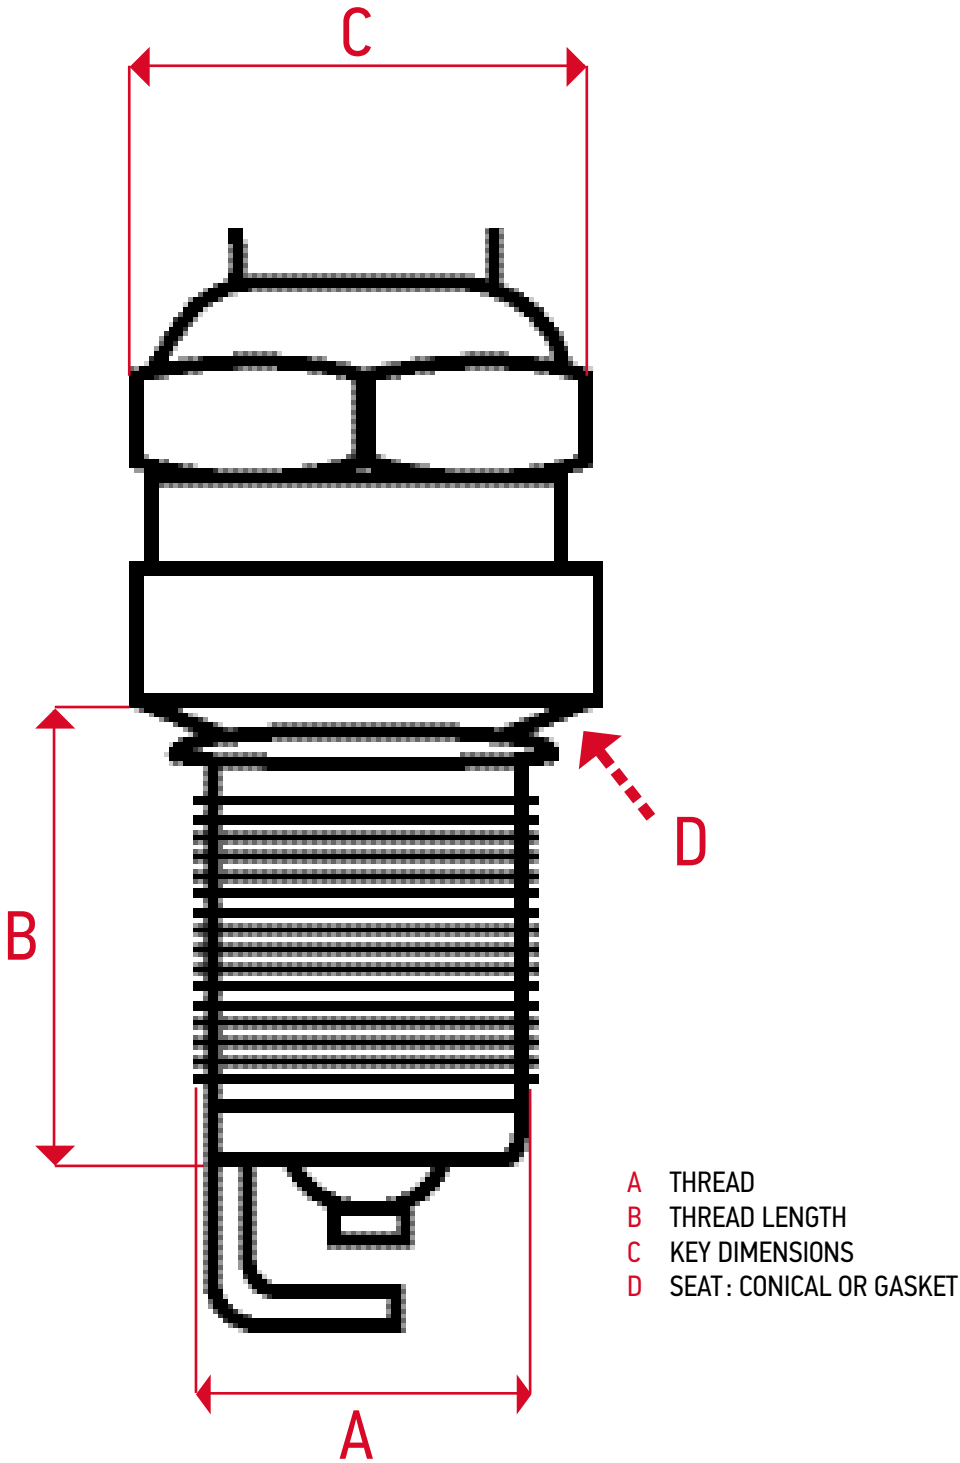

Sealing washer

Ensures gas tightness of the combustion chamber and a proper heat transfer from the spark plug to cylinder head.

Insulator tip

Its shape facilitates regulation of heat removal from the combustion area.
