

# SpeedCut ™ System

Saw Chain and Guide Bars

## SpeedCut System

Get your cutting done easier and faster. Our SpeedCut™ System works as hard as you do. Made for mid-size saws ( $\leq 55\text{cc}$ ). The narrow kerf guide bar and saw chain need less power for faster cuts in most conditions.

### Saw Chain

- Faster\*** Get a faster, easier cut with a reshaped cutting surface and narrow kerf design
- Sharper\*** Sharper, more durable cutting edge from a new precision grind and optimized cutting angle
- Easier\*** An easier to sharpen chain, with the cutting surface matched to the file. More indicators help you spot the recommended filing angles.
  - + Always use with bars designed for narrow kerf saw chain. Look for the .
  - + LubriTec™ keeps guide bar rails and rivet joints oiled, for less wear and longer life
  - + Replaces 95VPX

### Guide Bars

- Lighter\*\*** For more control and less fatigue with a light-weight aluminum core
- Stronger\*\*** Stiffer and stronger with aerospace bonding technology
- Longer Lasting\*\*** More durable on the job, from a redesigned nose with new parts and materials. Harder bar rails designed to last longer.
  - + Better chain retention and less wear via precision rail groove design
  - + LubriTec™ keeps the chain drive link and chain rivet joints oiled, for less wear and longer life
